STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The applicant's amended claims dated 4/13/2005 have been fully considered and overcome the previous 35 USC 102 rejection.

The applicant's arguments that the Watts (U.S. Patent 3,871,983) reference does not disclose a rotating hydraulic motor are persuasive (arguments page 18, paragraph 1). The rotating motor of toothed ring construction is not novel or new, but would be unobvious to combine with the apparatus disclosed by Watts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The patent to Brewer (U.S. Patent 5,071,327) was cited as an example of a rotating motor of toothed ring construction, commonly known as a gerotor motor.
